NT Sulphide Project and Mt. Fitch Uranium Project Feasibility Studies to Commence with appointment of General Manager New Projects

Compass Resources is pleased to announce the appointment of Mr. Richard Dossor as General Manager New Projects.

Richard has had extensive experience in Australia and overseas in mine/ore processing project development and implementation. He has specific experience managing scoping and feasibility study teams for mining projects and process segments including for mine materials handling systems, mineral sands projects, the Northparkes underground development and the Kanowna Belle Gold Project.

Richard has also project managed or held senior management team positions in several iron ore expansion projects in the Pilbara region of WA, and has direct experience in mine construction management.

Compass gains Richard's valuable experience to drive the impending feasibility studies for the Compass and Hunan Nonferrous Metals Corporation major NT sulphide project, and the Compass owned Mt. Fitch uranium project.

Richard will also provide the Company with the ability to move more rapidly into scoping and feasibility assessment as exploration project potential advances, and with the assessment and evaluation of new acquisitions.

We welcome Richard to the Compass team.
